

LOCASALE LAB PROTOCOLS

Shipping Instruction

1. All samples should be shipped on dry ice as dry pellets.
2. It is recommended to send two tubes per sample (the original and backup samples after you split the supernatant into two tubes).
3. It is required to place sample tubes in hard cover boxes or plastic tubes to avoid cracking during shipment.
4. It is also required to email us a brief description of samples (such as cell number, tissue weight and so on) before shipping the real samples.
5. Shipping address:

Xiaojing Liu
Locasale lab
C264 LSRC
308 Research Drive
Durham, 27710, NC
Phone: (919) 681-6210
